

# Hacktoberfest 2025 – Contribution Documentation

**Author:** Muhammad Farhan Saleem  
**Date:** October 2025  
**Pull Request:** [#12250 – Add Muhammad Farhan Saleem – CONTRIBUTORS entry, profile, and ML Hello World script](#)  
**Repository:** [AliceWonderland/hacktoberfest](#)

## 1. Objective

This contribution was made as part of **Hacktoberfest 2025** and focuses on non-core code participation, aimed at understanding the open-source contribution workflow. The goal was to:

- Add contributor details in CONTRIBUTORS.md.
- Create a personalized profile Markdown file.
- Submit a minimal Python Hello World script themed around Machine Learning.

## 2. Contribution Summary

File	Description
<b>CONTRIBUTORS.md</b>	Added new entry for <i>Muhammad Farhan Saleem</i> including GitHub username.
<b>profiles/MuhammadFarhanSaleem.md</b>	Personal Markdown profile introducing the contributor.
<b>scripts/hello_farhan.py</b>	Python script printing an ML-themed greeting message.

## 3. Implementation Details

### Profile Page

The profile file (profiles/MuhammadFarhanSaleem.md) contains a brief introduction, current learning focus, and social media links.

### Execution Command:

python scripts/hello\_farhan.py

### Output:

Hello, Hacktoberfest 2025! I'm Farhan — exploring ML & open source.

## 4. Validation and Review

Checkpoint	Status
Repository formatting rules followed	✓
File structure verified	✓
Script executed successfully	✓
No external dependencies introduced	✓
Markdown rendered properly	✓

## 5. Repository Snapshot

hacktoberfest/

├── CONTRIBUTORS.md      # Updated with contributor info

├── profiles/

│ ├── MuhammadFarhanSaleem.md # Added profile page

└── scripts/

├── hello\_farhan.py      # Added greeting script

## 6. Observations

- Ensured file placement followed repository contribution rules.
- Tested Python script locally with default interpreter (Python 3.10+).
- No dependencies, keeping contribution lightweight.
- Markdown profile validated via GitHub preview.
